Summary

PHP Developer with professional experience building RESTful APIs, backend modules, and SaaS features using PHP and MySQL. Experienced in third-party API integrations, CMS development, and production troubleshooting. Hands-on experience developing Laravel applications using MVC architecture, Eloquent ORM, Blade, middleware, authentication, and validation.

Technical Skills

Languages: PHP, JavaScript, HTML5, CSS3
Frameworks & Libraries: Laravel, Bootstrap
Backend Development: RESTful APIs, MVC Architecture, Authentication, CRUD Operations
Laravel: Eloquent ORM, Blade, Form Requests, Middleware, Validation
Database: MySQL, Database Design, Query Optimization
Tools: VS Code, Git, GitHub, Composer, Postman, Swagger
Concepts: API Integration, Responsive Web Design, Debugging, CMS Development, SaaS Applications, Payment Integration

Professional Experience

PHPTRAVELS June 2025 – Nov. 2025

Junior PHP Developer

- Developed RESTful APIs in PHP for authentication, CMS, newsletter subscriptions, blog management, and dashboard modules within a multi-tenant SaaS platform.
- Built a currency conversion API supporting dynamic exchange-rate updates and consistent pricing across multiple agency customers.
- Integrated the Hotelbeds cancellation API, handling request validation, response mapping, and confirmation workflows for the booking engine.
- Completed the official Hotelbeds API certification and adapted API responses to meet client-specific data requirements.
- Diagnosed and resolved production-level PHP/MySQL issues and tested API integrations against frontend requirements.
- **Tech Stack:** Core PHP, MySQL, JavaScript, Bootstrap, RESTful APIs, Git, Swagger, Postman.

Cat Marketing Systems Jan. 2025 – June 2025

PHP Developer Intern

- Converted Figma designs into responsive frontends using HTML, CSS, Bootstrap, and JavaScript.
- Developed HOTLINE, an assigned real estate management CMS using PHP and MySQL, featuring role-based access control (RBAC), CRUD operations, and property and expense tracking.
- Built administrative dashboard functionality to manage property records, expenses, and user access controls.

Selected Projects

Evently | *Laravel, PHP, MySQL, JavaScript, Bootstrap, Stripe, Git* | GitHub

- Built an event booking platform using Laravel MVC, Eloquent ORM, Blade, Form Requests, middleware, authentication, and MySQL database relationships.
- Implemented separate free and paid booking workflows, integrating Stripe Checkout for paid bookings without Laravel Cashier and protecting checkout routes with authentication middleware.
- Designed booking and event data structures with relational database constraints, Eloquent relationships, validation, and booking status handling.
- Implemented event image and cover-image uploads with client-side previews and server-side validation.

HISAAB | *PHP, MySQL, JavaScript, Bootstrap, Git* | GitHub

- Developed a personal expense tracking web application using Core PHP and MySQL for managing daily financial records.
- Implemented user authentication, CRUD operations, expense categorization, email verification, password reset, and monthly expense reporting.
- Designed responsive dashboard interfaces using Bootstrap and JavaScript, with secure database interactions.
